

Late at night I look up, I feel a little sad
You are last in the line, they treated you so bad
You were kicked out just because, you're a little small
But to me Pluto you'll always be the cutest one of all

I miss you Pluto, you always be a planet to me
Don't care what they say in any observatory
I miss you Pluto, though you're mostly rock and ice
Give Pluto a break my friends, do we have to be so precise?
I miss you Pluto, the solar system's caboose
Let's make Pluto a planet again, what've we got to lose?

I grew up with nine planets and now there's only eight
Pluto all you need to do is put on a little weight
Neptune who for all these years, has been feeling fine
Now is suffering low self esteem from being last in line

I miss you Pluto, you always be a planet to me
Don't care what they say in any observatory
I miss you Pluto, though you're mostly rock and ice
Give Pluto a break you guys, do you have to be so precise?
I miss you Pluto, the solar system's caboose
Let's make Pluto a planet again, what've we got to lose?

I learned this to recall what the order planets was
My Very Educated Mother Just Served Us Nine Pizzas
Without Pluto we lose the whole pizza thing
My Very Educated Mother Just Served Us... Nothing

I miss you Pluto, you always be a planet to me
Don't care what they say in any observatory
I miss you Pluto, though you're mostly rock and ice
Give Pluto a break you guys, do you have to be so precise?
I miss you Pluto, the solar system's caboose
Let's make Pluto a planet again, what've we got to lose?
